

NemoStudio

Digital Restorative Platform

Why NemoStudio?

- ▶ The most powerful Interdisciplinary Digital Restorative Dental Platform.
- ▶ Cloud-based, access your data anywhere, anytime.
- ▶ AI driven platform with automated workflows reducing significantly planning time and allowing you to fully concentrate on the clinical aspects of the case.
- ▶ From records to products. Full range of devices integration (CBCT, IOS, intraoral and extraoral digital Xrays, 3D printers...)
- ▶ Co-Op environment for Orthodontics Clinics, Planning Centers, Labs and Industries.
- ▶ NemoStories™: Get your patients and referrers amazed. Automatically build your cases stories and share them in your favorite social network.

DAY 1 First Visit

Today patients have no time to waste. We can offer them an immediate “preliminary” treatment proposal that raises their awareness about their problem and achieves their acceptance and commitment.

Protocol

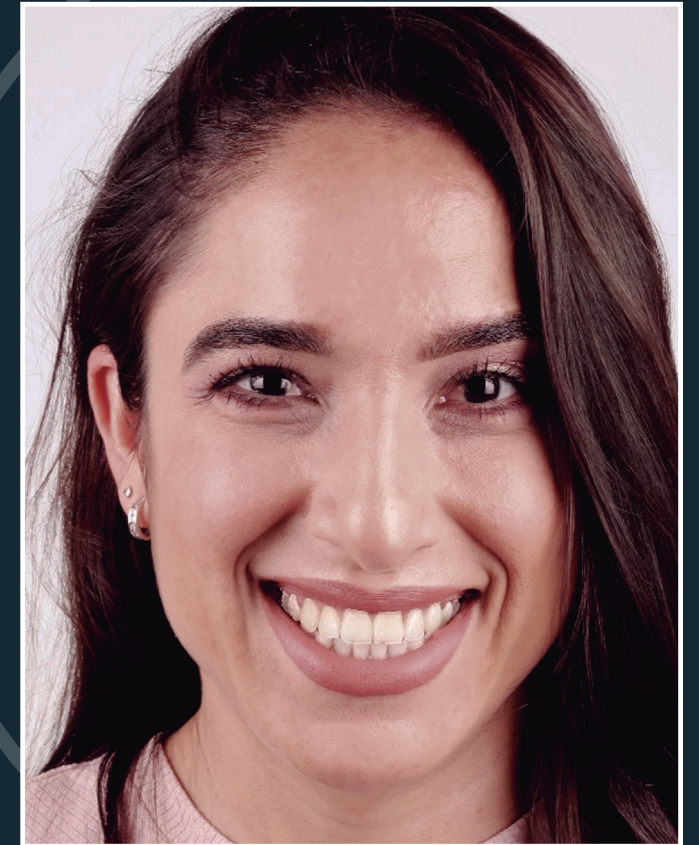

We take records:

- Intraoral scan
- Photographs
- Xrays - CBCT

Smile simulation
NemoSmile

”

Thanks to our developments in AI we can offer realistic simulations based on real patient records.

Diagnosis AI Driven!

NemoSmile

- ▶ Facial and Smile Analysis
AI based Automatic Landmarks Tracing.
- ▶ 3D Diagnose: Models Analysis, malocclusions,
missing teeth, white and pink aesthetic.

NemoScan

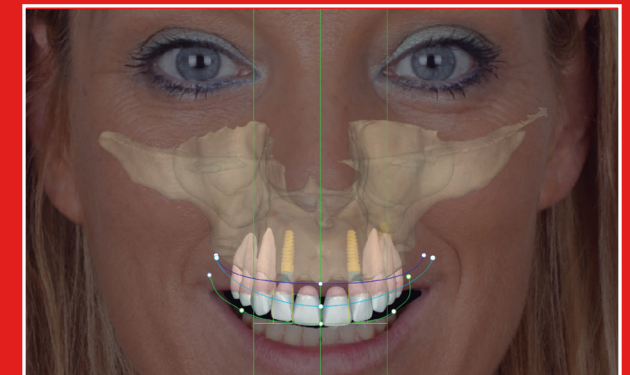

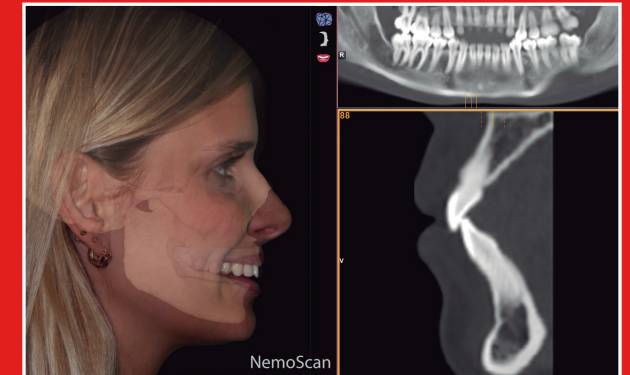

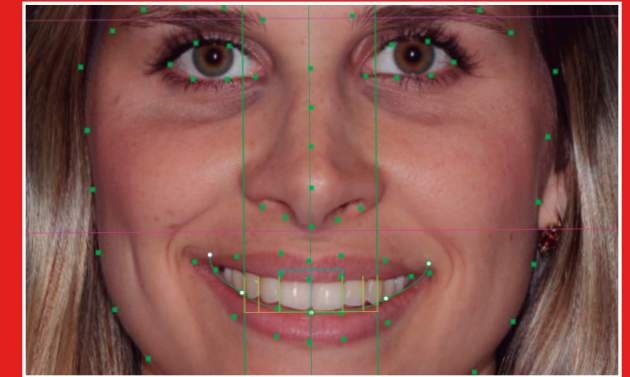

- ▶ Bone, Sinus, nerves, Teeth and Biological
Space 3D Diagnosis from CBCT/CT and
Models.

2D Diagnosis

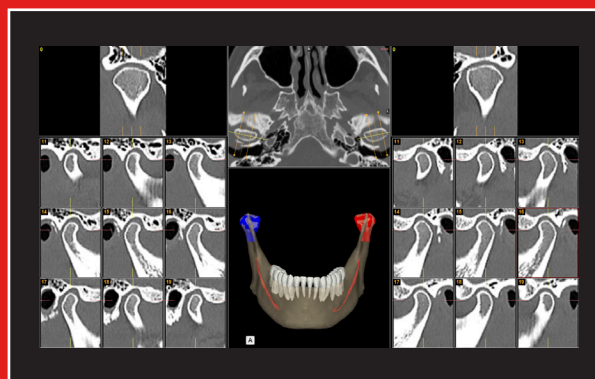

CBCT Orientation based on clinical exam

Soft tissue analysis

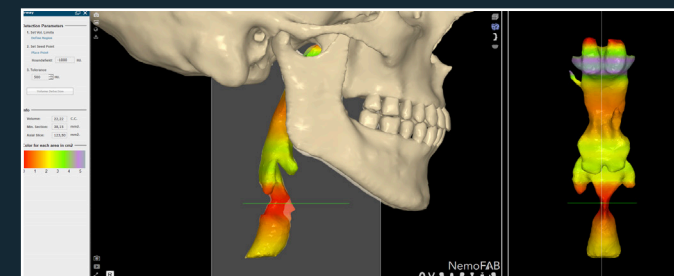

TMJ diagnosis

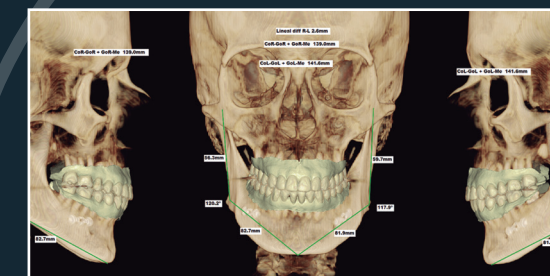

Go beyond your diagnosis

NemoFABIDental

- For those cases where is indicated, you can have TMJ, Airways and Craniometric Analysis.

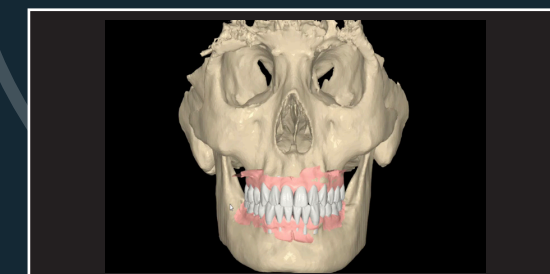

Airways analysis

Mandibular craniometry

- Functional Static (Virtual Articulator) and Dynamic (Jaw motion data) can also be performed in your patients for a complete diagnosis of your case.

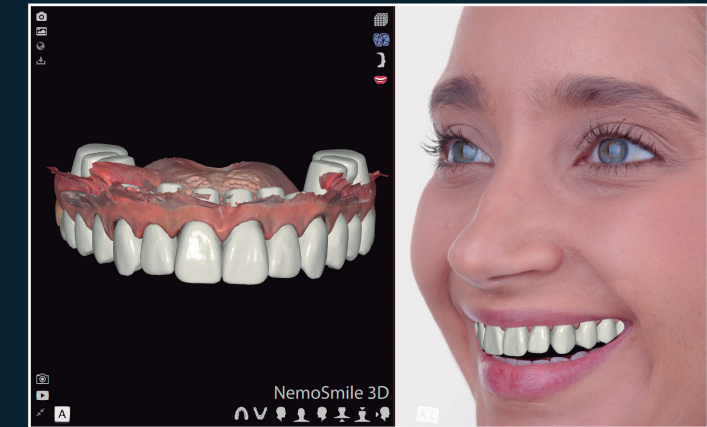

Jaw Trackers

Treatment Plan Expert System Driven!

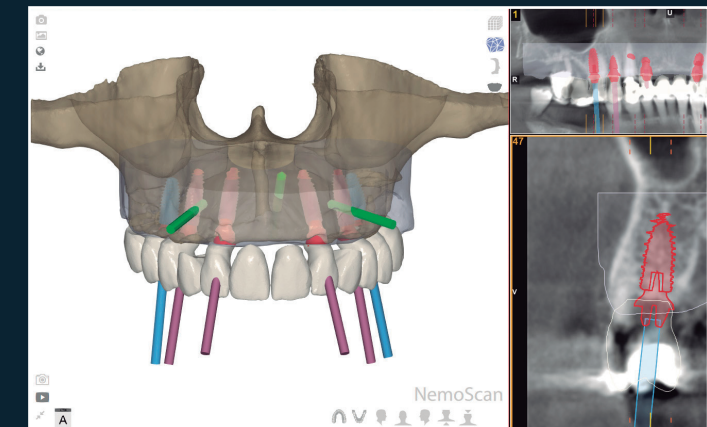

- ▶ Prosthetic feasible digital wax up. It could be done facially driven for veneers or full arch restorations to get a predictable treatment. Motivational and ideal mockups. Design of guides for the planning: crown lengthening, gingivectomy and preparation guides.
- ▶ Surgical planning, anatomical and functional prosthetic oriented. Depending on the type of case, different planning simulations can be done:
 - Virtual teeth extractions
 - Implants and abutments planning
 - Bone reduction planning
 - Bone graft planning
- ▶ Design the final product: surgical guides, bone reduction guides, membranes, immediate loading...

Implant treatment Planning

All in One surgical guides

DAY 2

Second visit

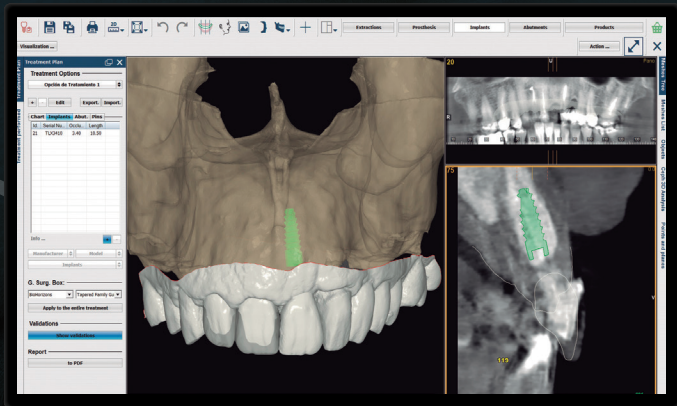

Tell your patient the storytelling of the diagnosis and treatment planning in detail

- ▶ For motivational mockups do the try in and photo / video presentation recreating the new patient smile.
- ▶ Use all the tools of communication/presentation embedded on the NemoStudio platform to show and explain the treatment plan, anatomical conditions and predictability that determine the different treatments options to propose to your patient.
